If there was an opportunity to get some additional testing for Methane Gas and Radon Gas in Water at a reduced price and as part of a research project – Would you be interested (Yes, No, Maybe)? _____

Any other Information _____

Instructions

1. Put the freezer pack in the freezer the night before collecting the sample. Fill Out the Form.
2. Remove the aeration device on your kitchen sink and allow the water to run for 15 minutes.
3. Collect the water samples in the morning. The sampling kit has two containers one for water quality and one for bacterial screen. Reduce the water flow from the sink to a steady stream and fill the bottles to the top. Please fill one bottle at a time. After collection, store the samples in the refrigerator. It is best to mail the kit back to us on a Monday.
4. Return samples to Keystone Clean Water Team at 15 Hillcrest Drive, Dallas, PA 18612 – 570-335-1947 or bfenviro@ptd.net.

Questions – Call Brian Oram – 570-335-1947

Note: Informational water testing screening test – not suitable for regulatory uses or real estate transactions. The testing is for personal information and education and the results are NOT reported to any agency.
