- **4 Heat Settings** • **40 min Auto Shut Off**
- **Capable of Moist Heat** • **Machine Washable Cover**

TriHeat's design was developed to target and relieve pain in multiple muscles and joints more comfortably and efficiently. Since two out of three sides are heated you can treat multiple areas at once simply rotate to the desired area needing treatment.

Traditional heating pads are flat, flimsy and constantly require adjusting to keep them in place. Every time you adjust a flat heating pad the heat is lost which makes it very difficult to receive any benefit from it.

Tri-Heat's design helps you to easily lock into the area needing treatment so you don't have to worry about readjusting it, allowing for a more comfortable and effective pain relief.
